EXECUTIVE SUMMARY

Software Developer with 3 years of experience managing enterprise applications with MERN stack, Next.js, and GenAI services. At Infosys, I helped to improve API performance by 20% for Mercedes-Benz dealer facing application. Now in Meaningful Innovation, I helped build Docbot and SARA a RAG-based applications using LLMs, HuggingFace, and vectorDB. I am eager to apply my full-stack and AI experience to ship modern, production-ready applications.

EDUCATION

Post-Graduate Certificate, Web Development

Sept 2024 – Dec 2025

Conestoga College, Kitchener, ON

Bachelor of Technology, Information Technology,

Aug 2017 – Apr 2021

Anna University, Chennai, India

SKILLS

AI & ML Services	Prompt Engineering, RAG, LLM Fine-tuning, OpenAI API, VectorDB
AI Development Tools	GitHub Copilot & Agent, Google Gemini, Google Colab, Hugging Face
Languages	Python, Java, Javascript, Typescript, SQL
Frontend	React, NextJS, Responsive Design, SEO
Backend & API	Node.js, Express.js, REST APIs, GraphQL, Microservices
Database	MySQL, MongoDB, Firebase suite, ChromaDB
Architecture & Patterns	Agile/Scrum, MVC Architecture, OOP & SOLID Principles
Tools & Platforms	GitHub, Gitlab, Docker, AWS, Vercel, DigitalOcean

EXPERIENCE

Software Engineer (SQL, LLM Fine-tuning, Hugging Face, Docker, ChromaDB)

Jan 2026 – Present

Meaningful Innovation

Kitchener, ON(Remote)

- Tested several LLMs in Google Colab and Hugging Face to find the right model which balances speed and accuracy in order to minimize hallucinations in the model.
- I created data pipeline for RAG based application, Docbot to handle various types of documents,convert them into embeddings and store them in ChromaDB.
- Implemented metadata filtering in the vector database to maintain the data differentiate between organizations and departments.
- Contributed in designing a high-level scalability plan for Docbot in order to handle high traffic while ensuring the highest security through data encryption.

Senior Systems Engineer (SQL, MongoDB, Node.js SAP ERP, SAP GRC, Jira)

Sept 2021 – Aug 2024

Infosys Limited — Mercedes-Benz, Japan

Chennai, IND(Hybrid)

- Led a root cause analysis for 5+ production issues, implemented permanent fixes successfully for those issues and participated in production deployments to monitor the workflow.
- Took a ownership and implemented permanent fix for a critical data-integrity bug which caused a chassis number mismatch between the Dealer frontend portal(DFE) (16 digit) and SAP backend system (12 digit)
- Contributed to optimize the dealer details API endpoints by implementing database indexing and response payload filtering and achieved 20% faster data retrieval in the Dealer Frontend Portal(DFE).
- With experience in SAP GRC system which uses role-based access control(RBAC) and provided required access for more than 500 internal team members and external users to access the dealer portal.
- Documented repeated production issues with temporary resolution to guide junior engineers, while escalating the root causes to implement permanent fixes.
